Journal of Fermentation Technology
Contents of Vol. 66, 1988

Originals

IM2, a New Inducer of Blue Pigment Production in *Streptomyces* sp. MAFF 10-06015
..... M. Yanagimoto, K. Matsumoto, and K. Mori···(1)
Purification and Properties of a New Enzyme, Propioin Synthase in Baker's Yeast Which Forms Propioin from Propionaldehyde
..... S. Morimoto, K. Azuma, T. Oshima, and M. Sakamoto···(7)
Highly Thermostable Neutral Protease from *Bacillus stearothermophilus*
..... M. Kubo, K. Murayama, K. Seto, and T. Imanaka···(13)
Photoproduction of Hydrogen by Adapted Cells of *Chlorella pyrenoidosa*
..... E. Kojima and Y. Yamaguchi···(19)
Denitrifying and Photoheterotrophic Growth of *Rhodobacter sphaeroides* S under Anaerobic-Dark and -Light Conditions ..... K. Sasaki, H. Morii, Y. Nishizawa, and S. Nagai···(27)
Production of Xylitol from D-Xylulose by *Mycobacterium smegmatis*
..... K. Izumori and K. Tuzaki···(33)
Effects of Seeding on Thermophilic Composting of Household Organic Waste
..... K. Nakasaki and T. Akiyama···(37)
Potential Availability of Anaerobic Treatment with Digester Slurry of Animal Waste for the Reclamation of Acid Mine Water Containing Sulfate and Heavy Metals
..... K. Ueki, K. Kotaka, K. Itoh, and A. Ueki···(43)
Microbial Hydroxylation of (−)-α-Santonin by *Aspergillus niger*
..... M. Iida, A. Mikami, K. Yamakawa, and K. Nishitani···(51)
Solid-State Culture of *Aspergillus niger* on Support
..... E. Oriol, B. Schettino, G. Viniegra-Gonzales, and M. Raimbault···(57)
Stability of Plasmid-Bearing Microorganisms in Batch and Continuous Cultures
..... P.-C. Wang, H. Ohtake, and K. Toda···(63)
Kinetic Studies on the Interesterification of Oils and Fats Using Dried Cells of Fungus
..... S. Kyotani, H. Fukuda, H. Morikawa, and T. Yamane···(71)
Effect and Control of Glucose Feeding on Bacitracin Production by Fed-Batch Culture of *Bacillus licheniformis* ..... T. Suzuki, T. Yamane, and S. Shimizu···(85)
Economic Significance of Increasing Cell Mass Concentration for Metabolite Production —A Theoretical Study— ..... T. Yamane, P. Sirirote, and S. Shimizu···(93)
Mixing State of Xanthan Gum Solution in an Aerated and Agitated Fermentor —Effects of Impeller Size on Volumes of Mixing Regions and Circulation Time Distribution— ..... H. Funahashi, K. Hirai, T. Yoshida, and H. Taguchi···(103)
Purification and Properties of Glutaminase from *Aspergillus oryzae*
..... T. Yano, M. Ito, K. Tomita, H. Kumagai, and T. Tochikura···(137)
Purification and Properties of Three Kinds of α-Hydroxysteroid Dehydrogenases from *Brevibacterium fuscum* DC33
..... S. Kinoshita, K. Kadota, T. Inoue, H. Sawada, and H. Taguchi···(145)
Isolation of L-Methionine-Enriched Mutant of a Methylotrophic Yeast, *Candida boidinii* No. 2201 ..... Y. Tani, W.-J. Lim, and H.-C. Yang···(153)
The Structure of High Molecular Weight Dextrins Obtained from Potato Starch by Treatment with *Bacillus macerans* Enzyme
..... Y. Kato, K. Mikuni, K. Hara, H. Hashimoto, T. Nakajima, S. Kobayashi, and K. Kainuma···(159)
Ethanol Production from Wheat Flour by *Zymomonas mobilis*
..... E. F. Torres and J. Baratti···(167)

Pilot-Scale Solid-State Ethanol Fermentation by Inert Gas Circulation Using Moderately Thermophilic Yeast ..... K. Sato, S. Miyazaki, N. Matsumoto, K. Yoshizawa, and K. Nakamura…(173)
Factors Affecting the Synthesis of the N-Terminal Methionine-Free Molecule of Recombinant Human Interleukin-2 by *Escherichia coli* ..... S. Fujimoto, M. Nakatsu, K. Kato, and K. Kitano…(181)
Fed-Batch Cultures of Recombinant *Escherichia coli* with Inhibitory Substance Concentration Monitoring ..... N. Shimizu, S. Fukuzono, K. Fujimori, N. Nishimura, and Y. Odawara…(187)
Comparison of the Kinetics and Factors Affecting the Stabilities of Chitin-Immobilized Naringinases from Two Fungal Sources ..... H.-Y. Tsen and S.-Y. Tsai…(193)
Cross-Flow Filtration of Yeast by Microporous Ceramic Membrane with Backwashing ..... K. Matsumoto, M. Kawahara, and H. Ohya…(199)
Phosphorus Removal by Pure and Mixed Cultures of Microorganisms ..... Q. Ye, H. Ohtake, and K. Toda…(207)
Cell Wall Mutants of *Saccharomyces cerevisiae* with Increased Digestibility by Cell Wall Lytic Enzymes and Protein Extractability ..... T. Nakajima, R. Konno, H. Nishihara, and K. Matsuda…(245)
Structural Alteration of Cell Wall Polysaccharides from *Saccharomyces cerevisiae* Mutants ..... T. Nakajima, H. Nishihara, Y. Chiba, and K. Matsuda…(251)
Copper Reduction by Yeast Cell Wall Materials and Its Role on Copper Uptake in *Debaryomyces hansenii* ..... T. Wakatsuki, M. Iba, and H. Imahara…(257)
Properties of Glucose-Dehydrogenase-Poly(Ethylene Glycol)-NAD Conjugate as an NADH-Regeneration Unit in Enzyme Reactors ..... A. Nakamura, H. Minami, I. Urabe, and H. Okada…(267)
Isolation of a Yeast Growing on Sardine Oil and Its Characteristics ..... Y. Ota and Y. Kushida…(273)
Isolation and Characterization of a Stable L-Arginine Producer from Continuous Culture Broth of *Corynebacterium acetoacidophilum* ..... T. Azuma, T. Nakanishi, and M. Sugimoto…(279)
Factors Affecting L-Arginine Production in the Continuous Culture of an L-Arginine Producer of *Corynebacterium acetoacidophilum* ..... T. Azuma and T. Nakanishi…(285)
L-Serine Production from Methanol and Glycine with an Immobilized Methylotroph ..... P. Sirirote, T. Yamane, and S. Shimizu…(291)
Formation of γ-Glutamylglycylglycine by Extracellular Glutaminase of *Aspergillus oryzae* ..... K. Tomita, T. Yano, H. Kumagai, and T. Tochikura…(299)
cis-Benzeneglycol Production Using a Mutant *Pseudomonas* Strain ..... J.-J. Yarmoff, Y. Kawakami, T. Yago, H. Maruo, and H. Nishimura…(305)
Benzene Toxicity and Yield Improvement in a *cis*-Benzeneglycol Production Process ..... J.-J. Yarmoff, Y. Kawakami, T. Yago, and H. Nishimura…(313)
Production of Isoprenoid Compounds in the Facultative Methylotroph *Protomonas extorquens* ..... T. Urakami and M. Hori-Okubo…(323)
Mirin-Making at Low Alcohol Concentration with *Koji* Prepared with a New Mutant of *Aspergillus usamii* ..... H. Oyashiki, M. Uchida, A. Obayashi, and S. Oka…(333)
Enzymatic Conversion of Dehydrodivanillin to Vanillin by an Anaerobic Recombinant FE7 ..... W. Chen, M. Ohmori, K. Ohmiya, and S. Shimizu…(341)
Effective Utilization of Horseradish and Wasabi by Treatment with Supercritical Carbon Dioxide ..... M. Taniguchi, R. Nomura, M. Kamihira, I. Kijima, and T. Kobayashi…(347)
Mechanistic Analysis of Xanthan Gum Production in a Stirred Tank ..... H. Funahashi, K. Hirai, T. Yoshida, and H. Taguchi…(355)
Distribution of Rare Actinomycetes in Japanese Soils ..... M. Hayakawa, K. Ishizawa, and H. Nonomura…(367)
Improvement in Citric Acid Production by Haploidization of *Aspergillus niger* Diploid Strains ..... K. Kirimura, S. P. Lee, I. Nakajima, S. Kawabe, and S. Usami…(375)

Production of Semi-Alkaline Protease by *Aspergillus niger*
..... H. Pourrat, C. Barthomeuf, O. Texier, and A. Pourrat···(383)
Isolation of New Anaerobic, Thermophilic and Cellulolytic Bacteria-JT Strains and Their Cellulase Production ..... F. Jin and K. Toda···(389)
Production of Raw Cassava Starch-Digestive Glucoamylase by *Rhizopus* sp. in Liquid Culture ..... H. Nishise, A. Fuji, M. Ueno, V. Vongsuvanlert, and Y. Tani···(397)
Influence of Water Activity on Aroma Production by *Trichoderma viride* TS Growing on a Solid Substrate ..... P. Gervais, J. M. Belin, W. Grajek, and M. Sarrette···(403)
Fermentation of Lactose by *Zymomonas mobilis* Carrying a Lac$^+$ Recombinant Plasmid
..... H. Yanase, J. Kurii, and K. Tonomura···(409)
The Ethanol Tolerance of *Pichia stipitis* Y 7124 Grown on a D-Xylose, D-Glucose and L-Arabinose Mixture ..... J. P. Delgenes, R. Moletta, and J. M. Navarro···(417)
A Novel Process of Ethanol Production Accompanied by Extraction of Sugar Cane Chips ..... S. Fukushima and K. Yamade···(423)
Simultaneous Saccharification and Alcohol Fermentation of Unheated Starch by Free, Immobilized and Coimmobilized Systems of Glucoamylase and *Saccharomyces cerevisiae*
..... K. D. Nam, M. H. Choi, W. S. Kim, H. S. Kim, and B. H. Ryu···(427)
Flocculation of *Aspergillus terreus* with Polyelectrolyte Complex and Production of Itaconic Acid with the Flocculated Mycelia ..... E. Kokufuta, S. Suzuki, and I. Nakamura···(433)
Culture Conditions for Intracellular Lipase Production by *Rhizopus chinensis* and Its Immobilization within Biomass Support Particles
..... T. Nakashima, H. Fukuda, S. Kyotani, and H. Morikawa···(441)
Construction of a Host-Vector System in the Osmophilic Haploid Yeast *Zygosaccharomyces rouxii* ..... K. Ushio, H. Tatsumi, H. Araki, A. Toh-e, and Y. Oshima···(481)
Analysis of a Promoter-Like Region in *Flavobacterium* Which Controls 6-Aminohexanoic Acid Linear Oligomer Hydrolase Gene Expression in *Escherichia coli*
..... M. Okazaki, T. Uemura, Y. Nishimori, K. Wakamatsu, M. Shimosaka, H. Saito, S. Negoro, and H. Okada···(489)
Molecular Cloning of a Gene Enhancing Yeast Glyoxalase I Activity and Its Effect on Yeast Cell Size ..... K. Murata, T. Saikusa, Y. Inoue, and A. Kimura···(495)
Large-Scale Production of Erythroid Differentiation Factor (EDF) by Gene-Engineered Chinese Hamster Ovary (CHO) Cells in Suspension Culture
..... M. Murata, Y. Eto, and H. Shibai···(501)
Ethanol Production in Simultaneous Saccharification and Fermentation of Cellulose with Temperature Profiling ..... S. Y. Huang and J. C. Chen···(509)
L-Iditol Production from L-Sorbose by a Methanol Yeast, *Candida boidinii* (*Kloeckera* sp.) No. 2201 ..... V. Vongsuvanlert and Y. Tani···(517)
Culture Conditions of *Aspergillus oryzae* for Production of Enzyme Preparation
..... T. Nakadai and S. Nasuno···(525)
Hydrolysis of Acid-Treated Protein by a Preparation of Proteases
..... T. Nakadai and S. Nasuno···(535)
Production of Raw Cassava Starch-Digestive Glucoamylase by a 2-Deoxyglucose-Resistant Mutant of *Rhizopus* sp. ..... Y. Tani, A. Fuji, and H. Nishise···(545)
Inulinase from *Chrysosporium pannorum*
..... R. Xiao, M. Tanida, and S. Takao···(553)
Product Inhibition and Its Removal on Josamycin Fermentation by *Streptomyces narbonensis* var. *josamyceticus* ..... H. Eiki, H. Gushima, T. Saito, H. Ishida, Y. Oka, and T. Osono···(559)
Interesterification of Fats and Oils by Immobilized Fungus at Constant Water Concentration ..... S. Kyotani, H. Fukuda, Y. Nojima, and T. Yamane···(567)
Humification Index (HI) as Evaluation of the Stabilization Degree during Composting
..... M. De Nobili and F. Petrussi···(577)
A New Method for Fluorometric Measurement of Proline in Grapes and Wines
..... K. Yokotsuka···(597)

Genetic Analysis of the Non-Sporulating Phenotype of Brewer's Yeasts
..... M. Tsuboi and T. Takahashi···(605)
Properties of NAD(P)H-Linked Aldose Reductase from *Cryptococcus lactativorus*
..... S. Kise, N. Koizumi, and H. Maeda···(615)
Purification of Recombinant α-Amylase with Immuno-Affinity Chromatography Using Monoclonal Antibody ..... M. Kamihira, M. Taniguchi, S. Iijima, and T. Kobayashi···(625)
Rapid Production of *Pediococcus halophilus* Salt-Tolerant Cells by a Cultivation Method Employing Gradual Increases in NaCl Concentration Using a Fermentor with a Microfiltration Module
..... M. Taniguchi, K. Hoshino, K. Shimizu, I. Nakagawa, Y. Takahashi, and M. Fujii···(633)
Production of L-Methionine-Enriched Cells of a Mutant Derived from a Methylotrophic Yeast, *Candida boidinii* ..... W.-J. Lim and Y. Tani···(643)
Isolation of a Fosfomycin-Hypersensitive Mutant and Production of α-D-Glucose-1-Phosphate from *Bacillus* sp. BA-3796 Screened by Its Use
..... T. Kamogashira, M. Sugawara, and M. Takano···(649)
Magnesium Requirement for Biological Removal of Phosphate by Activated Sludge
..... H. Imai, K. Endoh, and T. Kozuka···(657)
Growth and Growth Estimation of *Saccharomyces cerevisiae* in Solid-State Ethanol Fermentation ..... K. Sato and K. Yoshizawa···(667)

Notes

Use of *Koji* Prepared with a High Citric Acid Producing Mutant of *Aspergillus usamii* as a Raw Material for *Saké* Brewing
..... H. Oyashiki, K. Murata, N. Hirai, N. Kurose, M. Uchida, A. Obayashi, and S. Oka···(111)
Influence of pH on Methane and Sulfide Production from Methanol
..... K. Minami, Y. Tanimoto, M. Tasaki, S. Ogawa, and K. Okamura···(117)
Influence of Redox Potential on Methanation of Methanol by *Methanosarcina barkeri* in Eh-Stat Batch Cultures ..... H. S. Jee, T. Mano, N. Nishio, and S. Nagai···(123)
Characterization of a Mutant of Thiostrepton-Producing *Streptomyces azureus* ATCC 14921 and Its Plasmids ..... S. Ogata, Y. K. Miyoshi, C. Kinoshita, and S. Hayashida···(213)
Ethanol Fermentation by an Efficient Strain, NRRL B-4286, of *Zymomonas mobilis*
..... H. Nellaiah, T. Karunakaran, and P. Gunasekaran···(219)
Production of D-Tagatose from D-Galactitol by *Mycobacterium smegmatis*
..... K. Izumori and K. Tsuzaki···(225)
Psychrophilic Methane Fermentation of Excess Sludge by Enrichment Culture
..... H. Matsuyama and K. Izumi···(229)
Continuous CH_4 Production from H_2 and CO_2 by *Methanobacterium thermoautotrophicum* in a Fixed-Bed Reactor ..... H. S. Jee, N. Nishio, and S. Nagai···(235)
An Improved Method with Computer Registration of Fermentation Activities of Microorganisms ..... J. J. de Soet and J. de Graaff···(239)
Mass and Energy Balance in Glucose and Lactose Metabolism in *Fusarium oxysporum*
..... I. K. Kumar and S. Mishra···(449)
Temperature-Sensitive Mutants of a Thermotolerant Yeast, *Hansenula polymorpha*
..... K. Ohta, S. C. Wijeyaratne, and S. Hayashida···(455)
Depression of Synthesis of Linoleyl Residue in *Zygosaccharomyces rouxii* Cells by Sodium Chloride ..... Y. Watanabe and M. Takakuwa···(461)
Improvement of Ethanol Production of Thermophilic *Clostridium* sp. by Mutation
..... N. Kurose, S. Kinoshita, J. Yagyu, M. Uchida, S. Hanai, and A. Obayashi···(467)
Changes of Microbial Flora and Enzyme Activity during the Aging of *Tou-Pan-Chiang*, a Chinese Fermented Condiment
..... C.-C. Chou, G.-R. Hwang, and F.-M. Ho···(473)
Conversion of 5′-Inosinic Acid to Inosine by *Streptomyces aureus*
..... K. H. Sohn, C. Y. Lee, K. H. Lee, Y. J. Cho, and J. H. Lee···(585)

ATP Production by an AMP Deaminase-Impaired Mutant of a Methanol Yeast, *Candida boidinii*..... T. Yonehara and Y. Tani···(591)
Cooling Aspects of Solid-State Cultures of Mesophilic and Thermophilic Fungi ..... W. Grajek···(675)
Saccharification of Gamma-Ray and Alkali Pretreated Lignocellulosics ..... A. Begum, H. Rashid, and N. Choudhury···(681)
